

GET READY FOR YOUR *Consultation.*

Ferguson showrooms offer more than the latest products from the world's best manufacturers. You'll find a passion for making your dream home a reality. Our consultants share your enthusiasm, but they also understand the building process and work with you to ensure that your project stays on budget and that the right products arrive at just the right time.

OUR UNDIVIDED ATTENTION

Choosing the products that will go into your new home is a process that shouldn't be rushed. We want to make certain that we understand your vision and can spend as much time as required to help you make the best product selections. Depending on the size of your dream home, your consultation may take two to four hours, so it's important to make an appointment.

SUGGESTIONS FOR YOUR APPOINTMENT

- Bring your home plans – Our consultants are well acquainted with building specifications and can suggest your best options.
- Know your budget or allowance – Your builder has established an allowance, which we'll keep in mind as we make suggestions.
- Bring magazines with ideas you like and color samples – Today's product options range from contemporary to traditional, from luxurious to functional. Having some idea of your tastes will help our consultants guide you in the right direction.

AFTER YOUR SELECTIONS

It's important for your contractor to know whether your choices will require additional labor costs, so we'll provide a list of your product selections. When you and your contractor have reviewed the list, we'll ask you to come in for a formal review to ensure that you're comfortable with your selections.

SCHEDULE A CONSULTATION

To begin the process, locate a showroom near you and call to schedule a consultation.
